```

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

prostaglandin-endoperoxide synthase (EC 1.14.99.1)
N;Alternate names: prostaglandin H synthase 2
C;Species: Ovis orientalis aries, Ovis ammon aries
C;Date: 31-Jan-1997 #sequence revision 31-Jan-1997
C;Accession: JC5063; S68339
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      A;Molecule type: protein
A;Molecule type: protein
A;Residues: 17-52;'G',100,'K',102-115;183-196;247-252,'H',253-255,'N',257;286-306;444-45/
A;Experimental source: placental cotyledons
C;Comment: This enzyme mediates constitutive versus inducible prostanoid production.
C;Superfamily: human prostaglandin-endoperoxide synthase; EGF homology
C;Keywords: chromoprotein; dlycoprotein; home; iron; metalloprotein; oxidoreductase

A;Molecule type: protein
A;Residues: 18-43 <SIR>
C:Comment: This protein provides the prostanoids involved in inflammation and mitogenesi
C:Comment: The active site Ser-516 is predicted to be inhibited by aspirin acetylation.
C;Superfamily: human prostaglandin-endoperoxide synthase; EGF homology
C:Keywords: chromoprotein; glycoprotein; heme; iron; metalloprotein; oxidoreductase; tra
F;1-17/Domain: signal sequence #status predicted <SIG-
F;1-17/Domain: signal sequence #status predicted *SIG-
F;18-604/Product: prostaglandin-endoperoxide synthase #status predicted <MAT>
F;27-294/Domain: EGF homology <EGF-
F;27-291/Domain: EGF homology <EGF-
F;37-291/Domain: transmembrane #status predicted <TMM>
F;371,516/Active site: Tyr, Ser #status predicted
F;374/Binding site: heme iron (His) (axial ligand) #status predicted
F;374/Binding site: heme iron (His) (axial ligand) #status predicted

-!- MISCELLANEOUS: This enzyme is the target of nonsteroidal anti-
inflammatory drugs such as aspirin.
-!- SIMILARITY: Contains 1 EGF-like domain.
-!- SIMILARITY: Belongs to the prostaglandin G/H synthase family.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              -!- COFACTOR: Binds 1 heme B (iron-protoporphyrin IX) growmolecule (By similarity).
